

(a) Single frequency θ

(b) Block values at $\Delta t = 5$

RoTHP: $\mathbf{R}(\Delta t)$

+0.07	+1.00
-1.00	+0.07

Oscillates
(values can increase)

HoTHP: $e^{-\theta'\Delta t} \cdot \mathbf{B}(\Delta t)$

vs

+0.4088	+0.3700
+0.3700	+0.4088

Decays monotonically
(values always decrease)
